

Statement on Risks and Actions related to COVID-19

At ABI, the health and safety of our employees, customers and all visitors to site is our number one priority.

We have carried out a risk assessment related to the risks posed by COVID-19 and implemented measures to reduce these risks and keep everyone safe at ABI.

ACTIONS

Actions have been put in place to help reduce the risks of COVID-19 on our site.

- All employees reporting positive for COVID-19 are required to be absent from work for 5 days
- We're advising staff to take sensible precautions to protect themselves from risk
- Visitors to site are requested not to attend site if they have COVID-19 symptoms
- We've staggered working hours and start and finish times to help reduce interactions throughout the day
- We're providing clear advice to employees on sanitising and have appointed a 'sanitising team' to conduct regular sanitising of key touch-points throughout the workplace
- We've created a dedicated "isolation area" that anyone who becomes unwell during the working day can use
- We are making LFT tests available for employees

All the steps we've taken, highlighted above, are supported by a risk assessment. We've consulted everyone who works here on these changes and have ensured they have received the detailed information and all the necessary training that relates to these practices.

Because the little things matter *even more*
